Freestanding Stainless Steel Dustbin for medical waste

For Used masks

Covid-19 has affected the production and life of human beings in many ways. People all over the world began to wear masks, which greatly helped us avoid the invasion of the virus.The wisdom of what to do with used masks will also be tested.There are unhealthy substances inside and outside the used masks, which need to be destroyed in a centralized way to avoid hiddendangers. Therefore, it is necessary to have a special pedal trash can to recycle the used masks in all public places.LAICOZY offers you the most professional choice.

Details pictures

Mute slow drop closure

Using the secondary mute slow down technique, the lid of the barrel is closed quickly and then slowly prevent accidental injury, shorten closure time, reduce odor overflow, and keep it mute.

The distance between the lid and the wall

Carefully designed to open the range of lid, will not touch the wall, to prevent scratching wall and barrel body.

Inner bin design

The concave position design on both sides above the inner bin makes it convenient to take it out and to replace the garbage bag .

Simple handle

The clever design of the back part of the barrel makes the simple knot beautiful and convenient to carry.
